THE DIETARY SUPPLEMENT PRODUCTS OFFERED BY DESIGNS FOR HEALTH ARE NOT INTENDED FOR USE BY CONSUMERS AS A MEANS TO CURE, TREAT, PREVENT, DIAGNOSE, OR MITIGATE ANY DISEASE OR OTHER MEDICAL CONDITION.

PaleoReds™ is a delicious whole-food extract of cherries, strawberries, blueberries, and other highly nutritious organic fruits and vegetables, as well as additional enzymes. One serving has the equivalent antioxidant capacity of four servings of fruit, based on ORAC (Oxygen Radical Absorbance Capacity; see explanation on back). However, if someone were to eat four servings of fruits they would also ingest an average of 60g of carbohydrates from a mix of the simple sugars glucose and fructose. PaleoReds™ was created to be low in calories and sugar (contains only 7g of effective carbohydrates) while providing all the phytonutrients from ten powerful fruits and vegetables with extracts from grape seed/skin and elderberry.

The synergistic power of fruits and vegetables for better health

PaleoReds™ offers the highest quality red/purple group of fruit and vegetable powders and extracts that studies show are beneficial for common chronic diseases and premature aging. PaleoReds™ powder contains over 82% certified organic ingredients, including phytonutrients and polyphenols from blueberries and apples, while also providing 200% of the daily value of vitamin C from the Amazonian acerola cherry. Top-quality ingredients such as these guarantee maximum potency and antioxidant protection.

Free radicals damage cells and may provoke degenerative diseases

Free radicals are unstable, sometimes harmful, molecules or atoms in search of stability. We cannot avoid generating free radicals; everything from breathing, exposure to sunlight, to the body's natural metabolic processes and chemical exposures creates them. Some scientists believe free radicals' cascading effect can easily create over 100 pounds of free radicals each year in the body. Free radicals wreak wide-ranging havoc. They damage DNA, lipid membranes, and cholesterol-carrying proteins like LDL, impairing and limiting the body's ability to optimally function.¹ This cumulative oxidative stress plays a role in virtually every degenerative disease.² Research suggests that free-radical damage may in fact contribute to conditions ranging from skin aging to cancer.³

Antioxidants help defend against excessive free-radical damage

Antioxidants step in to help mitigate this damage. They prowl LDL particles and the cell's lipid bilayer, among other places, to neutralize free radicals before they take a toll on the body's health.⁴ An array of colorful fruits and vegetables provides a powerful source of phytonutrients that serve as antioxidants to quench free radicals and much more.

Supplement Facts

Serving Size 9 grams (approx. one tablespoon)
Servings Per Container 30

Amount Per Serving	% Daily Value	Amount Per Serving	% Daily Value
Calories	30	Vegetable Proprietary Blend	1865 mg †
Sodium	25 mg 1%	Organic Carrot Powder
